

Cybersecurity Assessment

Accelerate Innovation and
Unlock Business Value with AI

Overview & Problem Statement

In today's rapidly evolving threat landscape, organisations face increasing challenges in identifying and mitigating cybersecurity risks. The Cybersecurity Assessment workshop is designed to help organisations evaluate their current security posture, uncover vulnerabilities, and develop a roadmap to enhance their defenses using Microsoft security solutions. This session provides a comprehensive view of how to leverage Microsoft Defender, Microsoft Vulnerability Management, Microsoft Purview Insider Risk Management, and Microsoft Secure Score to protect against modern threats.

What to Expect

This workshop showcases and demonstrates the value of the following Microsoft security tools:

- Microsoft Defender
- Microsoft Vulnerability Management
- Microsoft Purview Insider Risk Management
- Microsoft Secure Score

At the end of the workshop, participants will:

- Better understand, prioritise, and address cybersecurity vulnerabilities and improve defenses against human-operated ransomware
- Understand, prioritise, and address data security vulnerabilities and minimise data security risks from company insiders
- Define next steps based on the engagement findings and your organisation's needs and objectives

Who Should Attend

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Chief Technology Officer (CTO)
- Architects/SMEs focused on End User Computing, Endpoint Management, Security, Virtual Desktop Infrastructure, and Azure

Duration

Approximately 3 hours
