Insight Managed Microsoft XDR

Expert support for security, from log ingestion and analysis to incident response and remediation

Insight is a certified and award-winning partner, helping organisations leverage scalable and cost-effective security resources in Microsoft 365® E5 suite like Microsoft Defender™ and Microsoft Sentinel™. Our work as a trusted security partner means we operate as an extension of your security team, offering products and services that help you make the most of your environments and unify security tool sets under a complete solution.

Key service areas

Log ingestion and analysis

Threat detection and protection

24x7x365 service

Incident response and remediation

About Insight Managed Microsoft Extended Detection & Response

Insight Managed Microsoft Extended Detection & Response (XDR) gives you eyes-on-glass visibility to visualise and investigate the attack chain. This offering is a 24/7 managed detection and response service that helps clients detect advanced threats and determine the correct course of action. Our expertise spanning threat detection, incident response and security operations, combined with our focus on building trusted relationships with client teams, strengthens your organisation's overall security picture.

Solution capabilities

- Advanced analytics
- Endpoint, network and cloud support
- Support for AWS®, Microsoft® Azure® and Office 365®
- Applied threat intelligence
- Remote incident response

- Response action execution
- Compliance reports
- Governance and security policy framework guidelines
- Ready access to historical data

Insight and Microsoft

Insight has earned all four Microsoft security specialisations:

- Cloud Security
- Identity and Access Management

- Information Protection and Governance
- Threat Protection

Benefits:

+ Simplify security management to relieve IT teams of excessive manual tasks.
+ Scale or make changes to your environment with ease.
+ Take the guesswork out of securing your environment.
+ Collect security data at cloud scale and integrate with your existing tools.
+ Leverage AI to detect emergent threats and reduce alert fatigue.

Outcomes:

+ Ensure complete visibility into the IT environment.
+ Modernise identity and access management.
+ Lean on proven tools and outside help.
+ Respond rapidly with built-in orchestration and automation.
+ Adopt a governance framework.
+ Automate and streamline.

■■ Microsoft

Why Insight?

A certified and award-winning partner of major security solution vendors

Aligned to industry standard frameworks (NIST & MITRE)

Vast experience developing audit- and board-ready collateral

Client success story
Utility Company Leverages Managed Services for Urgent Security Initiative

Challenge: In the wake of a high-profile outage, the client needed support mobilising in-house resources to meet the complex requirements of a new Transportation Security Administration (TSA) security directive within an expedited timeline.

Solution:

- Insight delivered a fully managed program with simplified workstreams supported by a team of experts.
- Our teams consolidated the 11 initial workstreams into five with respect to the key workload dependencies.
- The client now benefits from reduced risk and security team burden as well as improved velocity.

Insight Managed Microsoft XDR components

Core Security functionalities		Corresponding Microsoft 365 E5 products
Identity		Entra ID
Endpoints & devices		Defender for Endpoints
Email & collaboration	Risk controls & conditional access policies	Defender for Office 365
Hybrid infrastructure		Defender for Cloud*
SaaS apps		Defender for Cloud Apps
Information protection		Defender for Cloud Apps
SIEM & SOAR		Microsoft Sentinel

*MDfC Incident Triage included

Partners for excellence in security

Insight Managed Microsoft XDR helps organisations improve their security posture, transform their Security Operations Center (SOC) and reduce security-related costs.

Detect: Improve security posture.	Investigate: Transform the SOC.	Respond: Reduce costs.
Platform-driven detection	**Investigation**	**Immediate action**
Advanced analytics engines uncover threats using machine learning and more.	Security experts provide recommendations via your console.	Security analysts contain detected threats on your behalf.
	Validation	
	Security analysts investigate flagged threats further, leveraging additional context and alert enrichment.	

Simplify security and compliance with Insight.

Insight provides a holistic, programmatic approach to identifying security gaps, providing recommendations and helping implement and manage security solutions. Not only do we offer assessment and solutions to help support compliance — we can also help with identifying and leveraging government and partner funding available for compliance-related security initiatives.

CISO Digest

Get monthly updates on your Insight Managed Microsoft XDR's status in the form of:

- A review of your environment's potential incidents
- Your detection coverage broken down in terms of initial access, exfiltration, etc.
- The value equivalent of the managed services provided to you by Insight
- Relevant news headlines

Driving innovation with digital transformation

At Insight, we help clients enable innovation with an approach that spans people, processes and technologies. We believe the best path to digital transformation is integrative, responsive and proactively aligned to industry demands. Our client-focused approach delivers best-fit solutions across a scope of services, including the modern workplace, modern applications, modern infrastructures, the intelligent edge, cybersecurity, and data and AI.
