Insight Quality Assurance and Testing Solutions

Mitigate application failure risks through effective quality assurance and robust testing

Business challenge

Organisations today face many challenges when it comes to quality assurance and testing. The increasing complexity of software applications, limited time and resources, and the cost of maintaining in-house testing teams are common examples of these challenges. By working with a dedicated and capable QA/testing partner like Insight, organisations can overcome these challenges and achieve their quality goals with confidence.

How we help

Insight's Quality Assurance and Testing team is composed of highly skilled and dedicated professionals, offering both onshore and offshore capabilities. Our extensive experience in software testing and quality assurance ensures that your applications adhere to the highest standards. With a team that includes seasoned QA experts proficient in a wide array of testing methodologies and tools, we boast a solid history of successful project completions.

Our team offers the following services:

- Test Planning and Strategy development
- Functional testing
- Performance / load testing
- Security testing
- Accessibility testing
- Automated testing
- Defect Management

Testing Centre of Excellence (TCoE)

Our TCoE is a framework where testing is maintained as a centralised service, shared across our organisation, and followed by the best testing services, templates, and tools to improve testing quality and effectiveness for our partners.

Benefits:

- **Reduce risk:** Minimise the likelihood of application failures and downtime
- **Enhance customer satisfaction:** Ensure a reliable and efficient user experience
- **Accelerate market entry:** Speed up the release cycle for faster product availability.
- **Cut costs:** Lower expenses related to development and support by preventing future issues
