

Discover risks from dark data and learn how to address them

Protect & Govern Sensitive Data Workshop

80%

of corporate data is “dark” – it’s not classified, protected or governed.¹

Not long ago, managing data just meant dealing with documents and emails. Pervasive digital technology and the rapid shift to remote work have greatly expanded the information universe. Much of that data becomes stale or unused immediately after creation and contains information that could impose a compliance risk.

Address compliance risks head on

Protecting information—wherever it goes—is critical to ensuring trust and meeting compliance requirements. But first, you need to know what data you have, where it is, how it’s being used, and compliance risks that may exist.

The **Protect & Govern Sensitive Data Workshop** gives you the insights you need to better discover, protect, and govern your corporate data.

As your business-critical data expands and your workforce shifts to remote work, having an integrated approach to mitigating and controlling privacy and regulatory risks is more important than ever.

By attending this workshop, our experts will work with you to:

- Document your compliance objectives and strategy including compliant Teams deployment and use
- Show how to understand, mitigate, and protect against potential privacy and regulatory risks from dark data
- Demonstrate ways to accelerate your compliance journey with the latest Microsoft technologies
- Provide actionable next steps based on your needs and objectives

¹ IBM. *Future of Cognitive Computing*. November 2015

Workshop highlights

Understand the hidden compliance risks of dark data

Assess your organisation’s dark data risks with Data Risk Check

Assess your environment against key data protection standards and regulations.

Receive an analysis and report on findings and associated risks

Learn about tools and services that can mitigate risks

Explore recommendations and next steps

What to expect

By the end of this workshop, Insight's experts in Microsoft compliance will provide you with a:

- Data Risk Check report that includes findings and insights from the automated discovery process
- List of recommendations and actionable next steps that will help mitigate the identified privacy and regulatory risks
- Clear look into Microsoft’s approach to mitigating and controlling privacy and regulatory risks
- Compliance Manager Tenant Assessment report with suggestions and top key improvement actions
- Set of long-term recommendations on your compliance strategy, with key initiatives and tactical next steps

Protect & Govern Sensitive Data Workshop

Insight will design the workshop based on information and recommendations that we discuss in the initial engagement set up

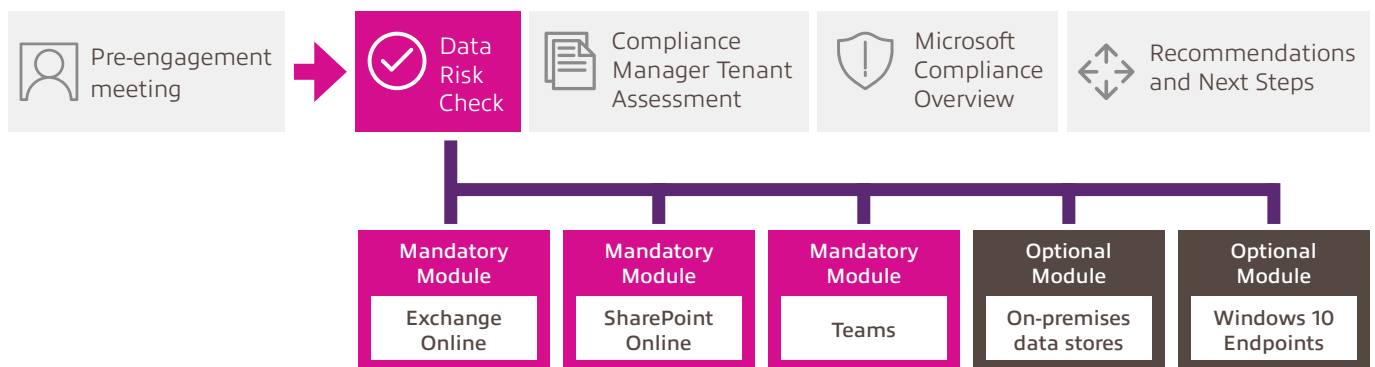

Data Risk Check uncovers data that can cause a compliance risk

The Data Risk Check is the core activity of the Protect & Govern Sensitive Data workshop. The activity is spread out over several weeks to allow time to run on top of your cloud infrastructure and surface privacy and regulatory risks in organisational data. Data Risk Check leverages automated Microsoft Purview tools and services to discover data stored in the Microsoft Cloud and identify potential problem areas.

We'll work with you to analyse your existing data for:

- Sensitive information and intellectual property
- Unused or "stale" data
- Risky or suspicious activities

The Data Risk Check, in its core, will identify privacy and regulatory risks in Exchange Online, SharePoint Online, OneDrive for Business and Teams, and can be extended with optional modules to scan on-premises data repositories and Windows 10/11 Endpoints.

Specific workshop deliverables will be outlined by a SoW which will detail the structure and expectations

Why Insight for Microsoft?

Few can compare with our relationship with Microsoft. Partners for 30 years and counting, we are the largest Microsoft global partner with more than 5,000 consultants and 1000 dedicated Microsoft resources globally. Our best-in-class capabilities, unmatched expertise, and ability to successfully deliver solutions built across all areas of Microsoft technology have earned us numerous recognitions.

7 Microsoft Solutions Partner Designations, including:

- Solutions Partner for Microsoft Cloud
- Solutions Partner for Modern Work
- Solutions Partner for Security

22 Specialisations, including:

- Adoption and Change Management
- Identity and Access Management
- Threat Protection

Microsoft Partner Awards, including:

- 2023 Microsoft Australia Partner of the Year
- 2023 Microsoft Hong Kong Partner of the Year
- 2023 Solution Assessments Partner of the Year
- 2022 Microsoft Surface Reseller Partner of the Year
- 2022 Microsoft Surface Hub Reseller Partner of the Year
- 2021 Microsoft Security Partner of the Year (Singapore)

3,000 Microsoft certifications globally
