

M365 Customer Immersion Experience (CIE)

Explore how you can maximise the value of your Microsoft 365 solutions.

The nature of work is changing and the modern workforce demands the ability to work anytime, anywhere, with anyone. You need to be able to harness the power of connectivity and collaboration to attract and retain talent, drive productivity, work securely and simplify management. Microsoft 365 solutions can help take your business forward with a comprehensive platform, unique intelligence and meaningful partnerships.

Your time is valuable. That's why we at Insight invite you to participate in our Microsoft 365 Customer Immersion Experience (CIE) Workshop. This is an interactive, online or face-to-face, session designed for professionals like yourself — so you can quickly and effectively experience how these solutions can help your business.

What is a Microsoft 365 Customer Immersion Experience (CIE)?

The Microsoft 365 CIE Workshop is a hands-on introduction to Microsoft's suite of productivity, collaboration, and security tools facilitated by Insight's Modern Workplace Specialists.

During the session you will test-drive Microsoft solutions through everyday scenarios, with a focus on Microsoft Teams and Microsoft 365 Security, and will experience the true impact of being a Microsoft-cloud organisation.

What to expect

Each session is unique and catered to your interests and needs. You'll walk away with a deeper understanding of:

- Implementing seamless collaboration across your teams
- Creating process automation and deliver real time business analytics
- Keeping information secure while being productive

Benefits

- Gain deeper understanding of the modern workplace.
- Learn more about solutions already available to you.
- Ask questions and work through real-life scenarios.
- Experience solution capabilities specific to your needs.

Duration

1 - 3 hours

Attendees

5 - 10 participants

2022 Partner of the Year Winner
Surface Hub Reseller Award
Surface PC Reseller Award
2022 Partner of the Year Finalist
Cloud Native App Development Award

Security & compliance shouldn't be this hard.

To provide employees with a secure and seamless working experience, wherever their location, you need a robust workplace solution that focuses on security and compliance. Microsoft 365 gives you the collaboration tools and analytics needed to unleash the full potential of your workforce.

Weighing up the available options around M365 licensing and deciding what is best for your organisation can be complicated, but getting it right is critical. Insight's Modern Workspace specialist provide advice and recommendations to help you make the right choice, delivering a more flexible, productive, and secure workplace.

Value-Added Microsoft 365 Security Workshops*

Insight will design your workshop based on information and recommendations that are discussed in the initial engagement setup.

Defend Against Threats with SIEM Plus XDR	Protect & Govern Sensitive Data
Given the complexity of data, applications, and infrastructure, it's essential to learn how secure your organisation is right now, and how to protect against future threats. During this workshop, we'll help you understand how to prioritise and mitigate potential attacks and strengthen your approach to cybersecurity.	Protecting information is critical to ensuring trust and meeting compliance requirements. The Protect & Govern Sensitive Data Workshop gives you the insights you need to better discover, protect, and govern your corporate data.
Secure Identities and Access	Endpoint Management
With identity attacks on the rise, this workshop will show you how to stop tomorrow's data breaches by securing identities today. We will help you find identity risks happening now in your environment, gain insights on your application landscape, and improve your identity security posture.	Experience the power of modern device management within your own environment. This workshop will show you how to leverage intelligent security, risk-based controls, zero-touch provisioning, advanced analytics, and deep integration to the Microsoft products you already use.

*subject to eligibility
