

Arctic Wolf Security Operations Solutions

Arctic Wolf solutions, available from Insight, combine people, processes and technology for 24/7 monitoring.

Business challenge

Cybersecurity has an effectiveness problem. Although businesses and organizations are investing more and more in security tools, breaches continue to occur.

Modern businesses face many security challenges, including:

- Environment visibility
- Security dissatisfaction from cost, complexity or noise
- Constrained resources
- Breaches and cyber incidents
- Confidence in their solutions

Too often, the addition of tools increases complexity and reduces effectiveness. People are the missing link. Without enough security experts to monitor and tune these tools, alerts are missed or outright ignored. Arctic Wolf takes a new approach to cybersecurity.

Our solution

Each Arctic Wolf® solution offers broad visibility, 24/7 coverage, access to expertise, strategic guidance and continuous improvement. With the Arctic Wolf Platform, a team of assigned security experts will learn about your business and routinely optimize your solutions for maximum effectiveness.

Arctic Wolf security operations solutions, available from Insight, offer:

- Unlimited visibility across your entire threat surface
- 24/7 monitoring across network, endpoints and the cloud
- Cybersecurity that's built for your budget
- Proven incident response
- Up to \$1 million in financial assistance through the Arctic Wolf Security Operations Warranty should you experience a covered security event

What makes Arctic Wolf effective?

Arctic Wolf combines their Concierge Security® Team — a dedicated team of security operations experts helping you manage and hunt down threats — and the Arctic Wolf Platform to offer uniquely effective security outcomes.

The cost of a data breach

IBM's annual Cost of a Data Breach Report¹ features research from the Ponemon Institute and offers insights from 537 real breaches. According to the report:

2022 has the highest average cost in 17 years.

Data breach costs rose from USD 3.86 million to USD 4.24 million — the highest average total cost in the 17-year history of this report.

Compromised credentials caused the most breaches.

The most common initial attack vector, compromised credentials, was responsible for 20% of breaches at an average cost of USD 4.37 million.

Cloud migration impacted costs and containment.

Organizations further along in their cloud modernization strategy contained the breach on average 77 days faster than those in the early stage of their modernization journey.

Arctic Wolf solutions

Achieve constant vigilance and broader visibility with these offerings, available from Insight.

Managed Detection and Response

Continuously monitor your networks, endpoints and cloud environments for better detection, response and recovery.

Managed Risk

Contextualize your attack-surface coverage to address even the most critical security challenges.

Incident Response

Prepares your team to recognize and neutralize social engineering attacks and human error.

Achieve a unified view.

The Arctic Wolf® Platform processes over 2 trillion events per week — enriching them with threat intelligence and risk context to drive faster threat detection, simplify incident response and eliminate alert fatigue.

A true end-to-end partner

Today, technology isn't just supporting the business; it's becoming the business. At Insight, we help you navigate complex challenges to develop fresh solutions and processes. We'll help you manage today's priorities and prepare for tomorrow's needs.
